

SEALED SYSTEM KIT

Imax Xtra EL 320 - 1240

These instructions must be read in conjunction with the Installation & Servicing Instructions supplied with the boiler.

NOTE. For appliance outputs from 715kW, two sealed system kits will be required. Each kit to be fitted to the Master and Slave Modules.

INSTALLING THE SEALED SYSTEM KIT

1. Screw the manifold onto the Flow manifold provided with the boiler.
2. The 2" outlet thread has been left for the installer to connect an appropriately sized expansion vessel for the system it is connected to.

NOTE.

When fitting the gas pipe ensure it does not conflict with the Sealed System Kit.
